Monocle Solutions, Johannesburg

Monocle Solutions are a specialist consultancy in banking and insurance solutions for major retail banks in South Africa.

Analyst

Monocle provided in-depth and rigorous training as part of a graduate programme – which occurred in tandem with consulting on a full-time basis. Part of this training taught valuable financial, data and computer skills, allowing Struan to become a subject matter expert at data handling and analysis, with qualifications in SQL, VBA, MS Excel and MS Access. Completed financial studies such as the Foundations of Financial Risk (FFR) and Financial Risk and Regulation (FRR) as part of Global Association of Risk Professionals (GARP). Monocle also developed critical writing and communication skills through the writing of case studies and critical pieces around banking regulation, as well as performing multiple presentations to the company and the company executive.

The consulting role included onsite consulting at a number of South African banks. Consulted on projects relating to IFRS 9, Trade and African data repositories. Key responsibilities included primary contact between the client and the consulting team, creation and maintenance of a data dictionary, data analysis and modelling and the creation of data quality rules.

Feb 2015 –
June 2016

University of Cape Town

Tutor

Struan tutored Advanced Micro and Macroeconomics and a marketing course on Consumer Behaviour, which involved the teaching and skills development of UCT students for the subject matter.
