

DID YOU KNOW?

We need men and women working together to respond strongly to climate change

So what can we do?
How do we make sure
men and women have
an equal voice?

IT STARTS WITH AWARENESS, AND
IT STARTS WITH EACH OF US

How do we make sure men and women have an equal voice in the fight against climate change?

WE CAN...

Understand our differences and identify our strengths

Start talking about how we see our roles and interactions as men and women

Change the way we think about gender dynamics and power relationships between women and men

Help men become educators for other men

This starts at home, school, and in the workplace
